

Marine Scavenger Hunt

Start Here

Seagrass

S: I provide shelter and food and help fishes breathe. To grow and thrive, it's sunlight I need. What am I?

S: What do I look like? The seagrass, of course! I'm long and I'm thin and my cousin's a horse! Draw me!

Mangrove

M: I use my long roots to hold me in place. When my leaves fall, many will come to give them a taste. Who am I?

Nearshore

N: We help clean the walls with our five sharp teeth. Be careful not to step on us when you're out on the reef!

CR: I'm a small pale fish with a body long and narrow. Draw a picture of me peeking out of my burrow!

M: The boys have one big claw but the girls' are both small. Around the roots of the mangroves is where we all crawl. Draw me!

How many legs do I have?

Oculina Reef

OR: We form large reefs, rare and bright white. Few people see us, we live with no light. Who are we?

How deep do we live?

Coral Reef

CR: I'm not related to elk, moose, or deer. The white tips on my branches mean, I'm growing here!

Hardbottom

H: I live my whole life in a borrowed home. I drag it around wherever I roam. Draw me!
